Jehovih III:6→

For each and every corporeal world created I a vortex first, and by its rotation and by the places in the firmament whither it traveleth, caused I the vortex to conceive the corporeal world.

Earth and her Plateaux.

When Jehovih condensed the earth, and it became firm and crusted over, there rose up from the earth heat and moisture, which continue to this day. But Jehovih limited the ascent of the substances going upward, and the boundary of the limit of moisture was as the clouds that float in the air; and the heat was of like ascent. And whilst the moisture and heat rise upward, they are met by the etheric substance of the vortex of the earth, and the moisture and the gases of the air assume the form of needles. On the side of the earth facing the sun the needles are polarized and acting, driving forth; the which is called light; but on the face of the earth opposite from the sun the needles are in confusion, and this is called darkness. Jehovih said: That man may comprehend the structure of the belt that holdeth the earth, I will give him a sign high up in the air. And Jehovih caused the vapor in the firmament to be frozen and fall to the earth, white, and it is called snow. For the snow-drop showeth the matrix in which it is molded. Jehovih said: Let this be a sign also, that

As I cause water to rise upward as vapor, and take a place in the air above, let it be a sign and testimony of other places in atmospherea whereon dwell the spirits of the lower heaven.

As I made a limit to the ascent of the clouds, so made I a limit to the places of the different kinds of substances in atmospherea; the more subtle and potent to the extreme, and the more dense and impotent nearer to the earth.

According to the condition of these different plateaux in atmospherea, whether they be near the earth or high above, so shall the spirit of man take its place in the first heaven; according to his diet and desires and behavior so shall he dwell in spirit on the plateau to which he hath adapted himself during his earth life.

even as there riseth up from the earth heat and moisture, there are representatives of all things on the earth which have evaporated upward, and all such things rise up to the level of the density like unto themselves, every one to its own level, and they take their places in the strata of the vortex. These are called plateaux, or spheres, for they surround the whole earth. Some of them are ten miles high, some a thousand, some a hundred thousand or more miles. And all these spheres that rotate and travel with the earth are called atmospherea, or lower heavens.

 <p>Se'muan Firmament. Jehovih said: Behold, I caused all living creatures to gestate in darkness. Jehovih answered him, saying:</p> <p>Open thy eyes, O man! There is a time of childhood, a time of genesis, a time of old age, and a time of death to all men. Even so is it with all the corporeal worlds I have created.</p> <p>First as vapor the vortex carrieth it forth, and as it condenseth, its friction engendereth heat, and it is molten, becoming as a globe of fire in heaven.  <p>The Earth in Se'mu. Jehovih saith: In the time of se'mu I brought the earth into a'ji, and ji'ay, and darkness was upon the face of the earth for the space of three thousand years; and yet for other three thousand years half darkness covered all the land and water. This unseen within me that is conscious of being? Tell me how all the living came into life.</p> <p>Jehovih heard the words of man and He answered him saying: Let a sign be given to man that he may comprehend se'mu. Thereupon Jehovih caused the jelly fish and the green scum of water to be permanently coming forth in all ages, that man might understand the age of se'mu, when the earth and the shores by the water, and the waters also, were covered over with commingled atmosphere and corporeal substance. And this substance was called se'mu, because by Jehovih's presence quickened He it into life, and thus made He all the living, both the vegetable and animal worlds. Not that se'mu is jelly-fish or the green scum of water; for the earth in this day produceth not se'mu abundantly; nevertheless the jelly-fish and the green scum of water are signs of that</p>

so gave I to the earth a time for the conception of the living species on the land, in the water and in the air above, and I called the time the era of se'mu. And it came to pass, when the earth was in the midst of Taza, there fell upon the earth, for a space equal to twelve days, condensed nebula in dust and stones and water combined, sufficient in some places to cover up the forests Jehovih had made. And that which fell was hot like molten iron; and the trees and forests of the valleys were beaten down, and covered up, and burnt to blackness. Jehovih said: And these shall remain on the earth, for in the time that followeth, man shall seek the coal, not knowing whence it came. And it will bear witness of the regions of a'ji and ji'ay in the firmament of heaven.

which was in that day of the earth.

Jehovih said: Because of My presence quickened I into life all that live, or ever have lived.

Because I am male and female, even in my likeness, thus made I them. Because I am the power to quicken into life, so, in likeness of Me thus, made I them, and with power to bring forth.

According to their respective places created I the living; not in pairs only, but in hundreds of pairs and thousands, and in millions.

According to their respective places and the light upon se'mu, so quickened I them in their color, adapted to their dwelling places.

Each and every living thing created I new upon the earth, of a kind each to itself; and not one living thing created I out of another.

Let a sign be upon the earth, that man in his darkness may not believe that one animal changeth and becometh another.

Thereupon Jehovih gave permission for different animals to bring forth a new living animal, which should be unlike either its mother or father, but he caused the new product to be barren.

Jehovih said: And this shall be testimony before all men that I created each and all the living, after their own kind only.

And I took the earth out of the dark regions, and brought her into the light of My ethereal worlds. And I commanded the living to bring forth, by cohabitation, every species after its own kind. And man was more dumb and helpless than any other living creature. Upon the earth the number of such angels was millions. To these angels spake Jehovih saying:

Jehovih prepares a way for the birth of Abram, Po, Brahma, and Ea-Wah-Tah.

In the one hundred and eightieth year preceding the dawn of dan; that is to say, two thousand nine hundred and twenty years after Fragapatti and Zarathustra, Jehovih sent swift messengers with six thousand ethereal loo'is from the Nirvanian fields of Chen'gotha in etherea.

And the swift messengers brought these words with them, to wit: Greeting to thee, God of the red star and her heavens, in the name of Jehovih! By the love and wisdom of Cpenta-armij, Nirvanian Goddess of Haotsaiti, we speak in the Father's name. Peace and joy be unto thee, O God, and to thy sub-Gods and Lords, and Lord Gods and Goddesses. One hundred and eighty years of darkness will now come upon thy kingdoms. And then the darkness will go away, and dawn will be in the places thereof. And in the time of darkness, behold, the nations of the earth will go down in great darkness.

But the light of the Father's Presence will not be destroyed. A little seed shall endure amongst mortals. That that seed may be propitious to the labor of thy Goddess, who will come in that day, she sendeth herewith two thousand ethereal loo'is for Vindyu; two thousand for Jaffeth, and two thousand for Arabin'ya.

Still onward, upward sped the airavagna, her hosts viewing the scenes on every side, here most, the richest part and most glorious places of Aalkwatka. Where the ethereal worlds, rich in the glitter of swamps shining on the countless rainbow arches and crystal pyramids, afford an extensive view of the new Orian boundaries of Oteson's broad kingdoms. Here course the thousands of excursionists from the measureless regions of the Huan lights, where are to be seen a million varieties of fire-ships, of sizes from ten miles across to the breadth of a world, in unceasing travel, in tens of thousands of directions, onward in their ways, every several one a history of millions of years, and of thousands of millions of souls, and every soul rich in the knowledge of thousands of worlds.

Jehovih said: Let the sign of the corporeal worlds be as the signs of the ethereal worlds (**D**); nevertheless they shall be independent of one another. Neither shall the travel of corporea (**C**) disturb the motions and positions of ethereal (**B**), but pass through, as if there were nothing. But the behavior of the ethereal worlds on corporea shall be to bring them to maturity and old age, and final dissolution. And it was so. And there floated in the midst of etherea certain densities, called a'ji and ji'ay and nebula, which sometimes augmented the size of the traveling corporeal worlds, and sometimes illumed them on the borders of the vortices, and these were called photospheres (**A**), because they were the places of the generation of light. (See Book of Cosmogony).

Ben VIII: 34→

**Cosmogony
VI:13-15**→

Let it be premised, then, that the ethereal firmament is not a waste and interminable nothingness; but that, on the contrary, it is in many regions, even between the earth and the sun, sufficiently dense for a corporeal man to dwell upon, and to walk about, even as on the earth. Some of these are as transparent as water or clear glass, and some opaque. Some of these ethereal worlds are large as the earth, and some a thousand times larger. Some are as immense fac-similes of snow-flakes; with arches a thousand miles high and broad. Some of them are as oceans of water; some transparent and some opaque; and some of them dense clouds of ashes. But so great are the numbers and so vast the varieties of these thousands of millions of ethereal worlds, that description is impossible. Yet, by the telescopic power of the earth's vortexian lens, these worlds are magnified so as to seem to be nonentities.

Worlds in solution, the ethereal heavens, are therefore governed by no power in, or escaping from, corporeal worlds. In the language of the ancient prophets, they are a law unto themselves. And yet these unseen worlds have much power and influence on the vortices of corporeal worlds.

In making observations with the spectroscope, these otherwise unseen worlds are sometimes seen; but in a general way the spectroscope revealeth only the refraction of high altitudes in the earth's vortex. It is an error to say the spectrum divideth the sun's rays *per se*. It is an error to say the spectroscope hath revealed certain colors in the atmosphere or photosphere of the sun or other stars. Its revelations for the most part

Then Jehovih said: I will put a sign in the firmament, and no man shall gainsay the work of My hand. And above the earth, to the north and south, He placed polar lights, that man might bear witness that light depended not on corporea, and had no part therewith. But the sun He placed in the midst of the great vortex, so that every side was as a pole to the corporeal worlds around it. And Jehovih made etherea as a condensing lens, so that the rotation of each and every corporeal world should manufacture its own light, on the side poling to the sun, by the rotation of its wark and vortex. And man saw that atmospherea turned the earth, and that the earth turned not atmospherea.</p>	<p>Ben VIII: 34→</p>	<p>Cosmogony I:35→</p>	<p>Neither light, nor heat, nor attraction of gravitation cometh from the sun to the earth. Heat decreaseth in force in proportion to the square of the distance from the place of generation; nevertheless, an allowance of decrease must be added thereunto of one to the hundred. Light decreaseth in proportion to the divisibility of rays, as will be mentioned hereafter. Though a man see the light of the sun, as he seeth a horse in a field, yet there is no such thing as travel of light in fact; nor is there any substance of light. But that which is called light is polarity of corporeal needles in solution, caused by the lines of vortexya. In experiments on earth, the flash requireth a certain time to polarize these infinitesimal needles, and for convenience sake such lapse of time is called the travel of light. When the flash continueth, as in the case of the sun centre, the master's infinitesimal needles remain poised from the sun centre outward, even to the earth, and may be compared to telegraph wires, with a battery at each end. But there is no travel in any sense whatever. Daylight is not, therefore, made by the sun, nor by the photosphere of the sun. Daylight is the condition of things polarized within the master vortex. Night is manufactured by the earth coming betwixt the master's focus and the outer extreme. So that both night and day continue all the time; and we realize them both alternately in consequence of the axial motion of the earth. Though the general form of a vortex, as before stated, in its beginning is long, funnel-shaped (like a whirlwind), its ultimate is toward a globular form. And though the current of a vortex is spiral, at first, its currents ultimate toward less spirality. If one could imagine a very long serpent in spiral form, constantly turning its head in at one pole, and its tail at the other, and forever crawling upon its own spirality, such a view would somewhat illustrate the currents of a vortex.

As previously stated, ethe holdeth corpor in solution, which is the condition of atmosphaera and of the etherean regions beyond. When a portion of this solution is given a rotary motion it is called a vortex. Nor is a vortex a substance or thing of itself, more than is a whirlwind, or as a whirlpool in the water. As a whirlpool can not exist without water, or a whirlwind exist without air, so can not a vortex exist without the etheic solution. As previously stated, in the beginning of a vortex it is long, but in course of time it hath a tendency to become round like a globe, but flattened a little at the poles. This also happeneth to every vortex that carrieth a satellite: That the periphery of the vortex is undulated; and the extent of its undulation can be determined by the minimum and maximum distance of the satellite from its planet.

Attraction, as previously stated, existeth not in any corporeal substance as a separate thing. There is no substance of attraction. Nor is there any substance of gravitation. These powers are the manifestation of vortexya. If vortexya be charged into a piece of iron or steel, it is called a magnet, because it <i>apparently</i> draweth its own kind to itself. When two pieces of steel, alike in quality, are charged with vortexya to their utmost, their power will be in proportion to their dimensions. If one be twice the size of the other, its magnetic force (so-called) will be in the main two times more powerful.</p>

The ordinary comet hath its tail away from the sun, but some comets have two tails, one toward the sun and one away. In the case of Biela's comet in the year 4 B.K. But when the eclipse falleth far in the north or south part of the earth only, then the action of the moon's shadow will fall in the direction of the earth's lens, so that a sub-lens is impossible.  <p>Mathematical Problems. Zero (line of velocity), with the two arrows, and the parallel lines crossing, are the signs of the boundary to a vortex. The oscillations of a planet are shown in the curves. In order to reduce the Panic signs to English, see Book of Saphah.</p>	<p>Cosmogony I:15→</p>	<p>Cosmogony III:16-19→</p>	<p>As the lens power loseth by flattening the vortex, and increaseth by rounding the vortex, it will be observed that the position of the moon's vortex relatively to the earth's, is a fair conclusion as to the times of ebb and flood tide. In periods of thirty-three years, therefore, tables can be constructed expressing very nearly the variations of vortexya for every day in the year, and to prophesy correctly as to the winters and summers, so far as light and darkness, and heat and cold, are concerned. This flattening and rounding of the vortexian lens of the earth is one cause of the wonderful differences between the heat of one summer compared with another, and of the difference in the coldness of winters, as compared with one another. Of these also, tables can be made. Winter tables made by the ancients were based on periods of six hundred and sixty-six years, and were called <i>satan's tables</i>, or the <i>times of the beast</i>. Tables made on such a basis are superior to calculations made on the relative position of the moon.</p> <p>But where they have prophesied ebb and flood tide to be caused by certain positions of the moon, they have erred in suffering themselves to ignorantly believe the cause lay with the moon. A man may prophesy by a traveling wagon what time it will reach town; but the correctness of his prophecy does not prove that the wagon pushed the horse to town. These revelations pertain more to the cause of things, than to giving new prophecies. What mortals can not discover by any corporeal observation must come by inspiration. In the year 4 B.K. Leverrier, of France, prophesied the existence of Neptune by the calculation of planetary</p>

Oahspe Plate Position Reference

			<p>disturbances. (See Humboldt's Cosmos, vol. iv., p. 357.) Other discoveries have been made in the same way; whereupon they have believed the said disturbances to be caused by one planet's power on another.</p> <p>Planetary disturbances are not caused by any power or effect of one planet on another; the cause of the disturbances lieth in the vortices wherein they float. Mortals can not see the vortices; their only means of prophesying lieth in corpor. A man may prophesy of the moon by calculations of the disturbances of the tides. But to attribute to the tides the <i>cause</i> of the moon's position would be no more erroneous than to attribute the cause of tides to the moon.</p> <p>It is not the intention, in these revelations, to give new calculations in regard to occurrences on the planets; it is a trifling difference whether a man prophesy by a vortex or by a planet. Wherein he erreth in regard to judging the cause of things, he should be put on the right road. Wherein he hath had no knowledge of the forces and currents of the unseen worlds and their dominion over the seen worlds, revelation only can reach him.</p>

The prophet of Jehovih said: A time shall come when the earth shall travel in the roadway of the firmament, and so great a light will be therein that the vortex of the earth shall burst, even as a whirlwind bursteth, and lo and behold, the whole earth shall be scattered and gone, as if nothing had been. But ere the time cometh, My etherean hosts shall have redeemed man from sin. Nor shall the inhabitants of the earth marry, for the time of begetting will be at an end. Even as certain species of animals have failed to propogate, and have become extinct, so shall it be with man. The earth will have fulfilled its labor, and its services will be no more under the sun. But the vortex of the sun shall be round, and the body of the great serpent coiled up. In the place where the earth was, shall some of My far-off worlds come and fulfill the labor allotted to them. And the atmosphereans who have not been redeemed from darkness in that day, shall alight on the new world and also fulfill their labor. (See Books of Jehovih and Saphah).

Were the earth's vortex to break, the earth would be precipitated into dissolution, under ordinary conditions. But were the earth's vortex to be swallowed in the vortex of another planet, then the earth would be precipitated as a globe to such planet. Such is the case as regarded double stars, and triplets and quadruplets, especially where they are in contact. The same principle holded in regard to the vortices of some nebulae and comets; one is frequently swallowed up within another. But in such case the corpor commingleth.

Snow-flakes.

Jehovih said: The corporeal worlds I created round, with land and water, and I made them impenetrable, for I bring forth the living on the surface of them. Let not man imagine that My ethereal worlds are also round and impenetrable; for, of all I have created, no two alike created I them.

Now, it came to pass in the lapse of time, that the atmosphereans so loved the lower heavens, that they strove not to ascend to the emancipated heavens of Nirvana, never having reached the bridge of Chinvat. But they oft returned to the earth and held converse with corporeans, and they lauded the glories of even the lower heavens, so that man looked up in wonder because of the magnificence of the works of the Father. Yet these were bounden spirits. Then Jehovih made the snow-flake and caused it to fall, that man might behold the beauty and glory of its formation. And he sent ethereans down from the emancipated heavens, and these taught man that whatever glory he had yet heard of, was as darkness is to light, compared to the beauty and majesty of the ethereal worlds. And the ethereans held up snow-flakes, saying: In the name of Jehovih we declare unto you, that the ethereal worlds are larger than the earth, and penetrable, and full of roadways of crystals, and arches, and curves, and angles, so that were man to

But it must be borne in mind that where one snow-flake is molded in one moment, another snow-flake molded in the same place the next moment, and so on, would display no two snow-flakes alike. At the sea-level a certain pressure seemeth to manifest, as in a barometer; on a high mountain a less pressure seemeth to manifest. There is also a variation in the barometer according to certain conditions of the atmosphere. The difference is not that the pressure of the atmosphere is different; the pressure of the atmosphere, *per se*, is the same in all directions, high and low. The cause of the variation of the barometer is in reference to distension (sublimated solution of corpor), and hath no reference to pressure as such. This capacity to distension is not only external to the barometer, but within it also; so that as a measure of atmospheric pressure *per se* it is entirely worthless. The suction pump, or inverted tube filled with water, showeth the pressure of the atmosphere upward as well as downward, and showeth what the pressure is.

Wherefrom it is shown there is no such thing as attraction of gravitation of the atmosphere toward the earth more than away from it. Where the atmosphere is overcharged with an imperfect solution of corpor, or snow or rain, that excess is that which balanceth toward the earth. But this also only applieth in regions close to the earth's surface. Fifty or a hundred thousand miles up from the earth, the axial velocity of the vortex is so great that rain or snow would be

instantaneously dissolved, distended and lost to sight. Consequently the solutions in the higher atmosphere not only contain moisture, but they contain iron, lead, zinc, gold, platinum, clay, granite, diamonds and all other things known to exist on the earth, and many others besides.

If one were to go into a circular field, a little way from the middle, and there construct an electric battery, from which he extendeth outward a multitude of wires, to small batteries in distant parts of the field, his batteries would then represent somewhat the solar phalanx, the central one being the sun. There would be more volume of electricity manifested at the central battery; but the intensity of the spark at one of the small batteries would, other things being equal, be equal to the spark at the central battery.

Neither is there more intensity of heat at the sun, than in any electric flash. Neither must it be surmised that the sun centre is an electric battery; nor that it supplieth in any sense anything to any other planet. As previously stated, there are two things, corpor and ethe; the latter is the solvent of corpor. Whirling vortices of the solution make planets. And these are the sum and substance of all things manifested in the universe.

It is an error to say the sun threw off rings or planets. No thing hath power to throw off itself, or a part thereof, save some living creature. They have instanced water flying from the periphery of a rapidly rotating wheel. This would merely imply that some one was trying to fasten worlds on the sun's periphery, but

A, Master. B, initiate. C, first gate. D, second gate. F, third gage. G, fourth sacrifice. I, oath of allegiance. J, place of death, represented by bones and skull. K, coffin. L, proof of spirit-power to overcome pain. M, submission to have the body run through with a lance. N, testimony that the initiate could endure all corporeal torture unharmed. This is the inner circle. The outside or body of the crescent represented the jewels and places of the Gods and Lords of heaven and their mortal representatives, together with the tools, implements and kind of industry to which each and every one was assigned. These constituted the audience during the ceremonies, the workers being stationed in the inner circle.

With brothers like these I will go forth and gather skulls to build another temple. (The servants help all that are alive out of the cellar, and if they are well and strong they are spared, but if they are maimed bodily, they are slain with the battle-ax. All that thus fail to take the first degree, have their skulls scraped and added to the throne, or judgment-seat. During the ceremonies, and along with the initiates, are two or more who have been previously initiated, and these of course are spared.)

First I.: To Thee and none else, I swear everlastingly. Thine be forever the place of skulls. (Ug'sa'sa)
(Golgotha.)

B-G-G.: Know, then, ye Iod'a (Gods), I am descended from Baugh-ghan-ghad, the All Spirit of Light and Power. By Him incarnate in Mi, virgin of the corporeal world, My blood is fed by the souls of men. In the days before the flood of waters My Sire built a temple a hundred goo'en square; with skulls built he it, and feasted on their souls, uprising in the firmament, above the sun, companion of the stars. On the spirits of mortals slain, His spirit feasted full of rich strength, till all the world bowed down and called Him Master!

Lo'iask, the Position of the Earth that Led to the Building of the Chinese Wall.

It came to pass, in those days, that the spirit of the Father dwelt in mortals, and they were turned away from the shedding of blood. And when the earth came into Lo'iask, in etherea, His ethereal angels penetrated the darkness and inspired the chosen of China to build a wall to protect themselves from destruction. And a wall was so built, the greatest on the whole earth. Jehovih said: Since these, My chosen people, have achieved the age of peace on earth, let them shut themselves in, away from the barbarians without, and they shall endure as a secluded people till the coming of Kosmon. And it was so.

In the meantime, the anti-war spirit of the people had cried out to the Creator: O Father, what shall we do to avert war, and to preserve the revelations of Thy holy ones of old?

And Jehovih answered them, through God of Paradise, Jehovih's Son, saying: Build ye walls against the barbarians. And your walls shall stand as a testimony of what ye are willing to do, rather than engage in war, even for self-preservation.

Because ye have faith in Me, I will be with you even unto the end.

And it came to pass that the Faithists of Chine'ya built stone walls, the greatest buildings in all the world. And they stand to this day.

Jehovih said: Behold the works of My chosen. As long as these walls stand, they shall be testimony of the struggle of My people, to maintain themselves, by means of peace instead of war. And the walls shall be monuments to the Faithists of this land, who have perished by the false Gods, Brahma and Budha.

Yea, the testimony of these walls shall be stronger, in time to come, against Brahma and Budha, than though every stone were a sword and spear. And the followers of My Son, Ka'yu, shall loathe them with pity and hate.

Joshu, Jesus, the most controversial character of today. In fact, he did not die on the cross; according to Jewish custom of the day, he had to be stoned to death. He reinstated Mosaic Law, saying: "I did not come to destroy the law but to fulfill it." The Most High is the law, governing the universe in word and power, as written, "I AM the law."

In using the words "the religion of Jesus," we simply mean the religion of Israel. We believe that Jesus of Nazareth was a Jew in every sense of the word. He did not establish a new religion, or preach a new doctrine in any shape or form. The preacher "from the mount, the prophet of the beatitudes, does not repeat with persuasive lips what the law-givers of his race proclaimed in mighty tones of command."

Jehovih said: When the world approacheth dan'ha in Mabea, the nations shall be quickened with new light: for Kosmon cometh out of the midst. And My etherean hosts shall press upon the understanding of men, and they shall fill all the nations and kingdoms with new discoveries and inventions and books of learning. And men shall be conceited of themselves above all the ages past, and they shall deny Me and quarrel with My name, and cast Me out. But I will come upon them as a Father, in love and mercy; and My hosts of heaven shall cause babes and fools to confound the wise, by signs and miracles. My hosts from heaven shall cause chairs to speak; and inanimate things to walk and dance. The dead shall reappear to the living, and talk with them face to face, and eat and drink, and prove themselves to the children of earth, and make My kingdoms known. Yea, they shall encompass the whole earth around about with signs and miracles, and set at nought the philosophy of men and idolatries of the ancients. For both, the living and the dead, shall know that I, Jehovih, live and reign over heaven and earth. This shall be a new era, and it shall be called

When Jehovih brought the great serpent (solar phalanx) along the road of Vorkum, in etherea, behold, the earth passed into the light of the Arc of Kosmon, rising upward, higher and higher in the dawn thereof.

To His etherean Gods and Goddesses, Jehovih said: As ye have founded arcs of light in my etherean heavens, to determine the travel of My corporeal worlds, so shall My God of the earth inspire mortals to build light-houses for man's ships that travel on the oceans.
