

Cancer: Why We're Still Dying to Know the Truth

by Phillip Day

Cancer: Why We're Still Dying to Know the Truth
by Phillip Day

In this book:

- Find out about the many who have recovered from hopeless cancer situations using nothing more complicated than the agency of this simple vitamin.
- Discover how the controversial vitamin B17 attacks cancer cells selectively, according to some of the world's most experienced cancer researchers.
- Learn why their findings were deliberately withheld from the public and buried with lies, deceit and ulterior agendas by the medical/chemical and charity industries.
- What is B17 Metabolic Therapy? Will it work for me if I have cancer?
- If it works so well with cancer, why doesn't everybody know about it?
- Why are industrialised societies falling hopeless victim to cancer while the more under-developed countries have traditionally escaped the worst?

- Why aren't current chemotherapy and radiotherapy cancer treatments working?
- What do some leading doctors and medical experts really think about chemotherapy?
- Discover why more people are making a living from cancer than are dying from it.
- Find out about the survey which reported that most oncologists would reject ANY AND ALL of their own treatments if they themselves contracted cancer.
- What are the Metabolic Therapy treatments, available for use even in your own home, that have saved the lives of countless cancer patients over the past forty years?

By the time you have read *Cancer: Why We're Still Dying to Know the Truth*, you will have all the information you require in order to make an informed decision on how to proceed with Metabolic Therapy, if this is your wish. Full contact details are given at the end of the book on how to obtain these treatments quickly and inexpensively from trusted companies, backed by some of the world's most successful cancer clinics.

"Few if any names in cancer research are as widely known as Kanematsu Sugiura's... Possibly the highest regard in which his work is held is best characterized by a comment made to me by a visiting investigator in cancer research from Russia. He said, "When Dr Sugiura publishes, we know we don't have to repeat the study, for we would obtain the same results he has reported." So wrote Dr C Chester Stock, head of Sloan-Kettering's cancer drug-testing division.

STATEMENTS TYPIFYING THE REAL CANCER WAR

"Most of what you have heard over your lifetime about cancer treatments is not the truth. At the very least, you have received an incomplete picture. If you believe the propaganda you have been fed and you develop cancer, it can cost you your life." - John Diamond MD, author

"To the cancer establishment, a cancer patient is a profit center. The actual clinical and scientific evidence does not support the claims of the cancer industry. Conventional cancer treatments are in place as the law of the land because they pay, not heal, the best. Decades of the politics-of-cancer-as-usual have kept you from knowing this, and will continue to do so unless you wake up to their reality." - Lee Cowden MD, author

"...as a chemist trained to interpret data, it is incomprehensible to me that physicians can ignore the clear evidence that chemotherapy does much, much more harm than good." - Alan C Nixon, PhD, former president of the

American Chemical Society

"...no disseminated neoplasm (cancer) incurable in 1975 is curable today... Many medical oncologists recommend chemotherapy for virtually any tumor, with a hopefulness undiscouraged by almost invariable failure." - oncologist Albert Braverman MD

"In the end, there is no proof that chemotherapy in the vast majority of cases actually extends life. This is the GREAT LIE about chemotherapy, that somehow there is a correlation between shrinking a tumor and extending the life of a patient." - Dr Ralph Moss, former Assistant Director of Public Relations at leading American cancer research facility Memorial Sloan Kettering, NY

"If I contracted cancer, I would never go to a standard cancer treatment centre. Cancer victims who live far from such centres have a chance." - Professor Charles Mathe, French cancer specialist

Radio host Laurie Lee: "So this is verified, that laetrile [B17] can have this positive effect?"

Dr Ralph Moss: "We were finding this and yet we in Public Affairs were told to issue statements to the exact opposite of what we were finding scientifically."
