

THE BOOK IN HEAVEN

Greetings:

Your actions have brought us together and a bond is made both where you are and from the section of Heaven where records are kept. At this time as records have been entered both by word and picture (The Earth scene) there is some upcoming changes both to the Elders and Wayne. May we be not hasty to grasp for heavenly inspiration. This is being attended to through our choirs for communication to mortals. A suitable channel is being prepared for these upcoming changes. It is a detailed work both for us as elders for guidance and for mortals that are bringers of light (Knowledge).

The generations of humans is entering into the time of the end. The end of Religion, law, and a society of multiple repeated laws and needless regulation is entered into. Humans have not been able to see clearly their own path, as the path of mortals is becoming a hard journey. Mortals now will revert to the divine line within all to find comfort from needless regulation.

That you be teachers of love and freedom is the heavenly request. Keep in mind that the society is not, or will not, become a religious body, this being foremost in any organization upcoming. To lean away from sectarian control always as the new is equal to the old.

Therefore equality tends to be the better way for growth and regulation kept to a minimum. The society is the key for understanding of the principles that are here to be acted upon for this new age. We must have some organization and record keeping for the benefit of all because of the present mortal system.

The Book of Heaven stores the history of the heavens as well as the earth. As Paradise has corruption so does earth at both human and sectarian levels. Do not be troubled with corruption as this is part of the master design. Corruption is the sign that the world is going through major change. As the corrupt dissipate into another substance so is the Society the new material for building of the new age.

The youth of today have rebelled within their groups and are telling in their only way that present conditions are not suitable anymore. The building material of the new age is within the younger generation; there is never a shortage of material. Thus the new growth for the new season becomes in fulfillment. The power of mind will open up to many as this is within the plan of the designer. It is so then as part of the designer we should not in any way doubt the manifestations of growing society.

Within the Elders there are many doors to levels of understanding, and not that one is better than another but the difference is important. As one person will understand the science of motion, so another will use this for travel. Finding that truth for so long has been hidden it is now to be welcomed, and that we are keepers of many powers of mind. To prove that the ability to create is within your grasp I would suggest that a pre designed thought for the Society's growth be nurtured placidly within the minds of the group. (Emphasis-Dan)

For this time of nurturing thought in the fertile-placid, garden soil a period of thirty days is all that is necessary. When roots have taken, the gardener then moves to another location in the garden and plants more seeds. The rate of growth is in direct proportion to the interest applied. The reasoning concerning negative thought is that it is such a potent device especially when used in a negative manner. With training the ability to accept only positive pictures with the scenes we paint in our mind. It is well to remember that thoughts with emotion attract like and similar thoughts. The power you hold is also as great as the emotion used for your request.

We have reached a situation where some matters concerning the Society may be difficult at this time for Wayne. Having sensed Wayne's thoughts it is time for him to be replenished. More than ever now his connection to the earth needs attention. Much of what has been said about the importance of not having rituals can be scrutinized at this time as symbols in spirit have the power of binding the thoughts of mortals. New days can be part of what the society is. Symbols that will be used for guidance of thought (prayer of freedom) will be within the realms of your spiritual residence. This is not possible at this time to transmit symbols as Wayne has had experience with many symbols and it would be wrong to portray to him the symbol of the Prayer of Freedom.

At this time ponder what you will and may it be of an accord of similarity for the pathway of the Society. As with all things physical, rest is needed and many items to be added to the new front page will be that which attracts without rule or obligation but with love and understanding. It is the time of the end for the regime of religion on this planet. It is a rest period

for the people of the Earth and this Society. Most high blessings are extended to the society.

Farewell till the next session.

The Elders

MESSAGE TO MAN

Greetings:

I am honoured and I am pleased to be asked to speak with the elders on this evening of yours. Please don't think that this is some kind of a miracle, as so many from the spirit realms have guided your families to bring together those couples that were made to be together. For many generations, in the past, the selected Angels knew you. Your time is the present and gathering together such a group has taken time and will take even more time yet.

You are at the right place in the roadway of the world, and many of you will pass through the barrier of life in the physical into the spirit realm. We, and your friends and family members, will be there to greet you. This place that I am from is where we make unsuspecting mortals into Angels (Laughter). It is the most rewarding work for all involved, as the newborn spirit wanders in amazement. Sometimes wondering where they left the car. But caring hands of angels have prepared a proper seminar for the newly arrived spirit.

Well, soon they find that the vehicles we use are not manufactured in the city of Detroit on the earth plane. (Laughter) Vehicles are not really needed because spirit is invisible and invincible. It is just a matter of thinking about where you want to be. No newborn will travel unattended here, as this first while is, for some, a time of learning and accepting that they are the same person but just have less weight (Laughter). Now as this topic has many areas to explain we will just set straight some of the basics.

Dear brothers and sisters remember in a previous discourse about how the action of mortals within a group, such as the Society, does have a very powerful influence to the areas at this level. It is wise to never underestimate the power of thoughts that are for the betterment of humanity. When many, for the same purpose, use these thoughts and the picture is set, there is no stopping its fulfillment.

There is no secret to be handed down from the ancients that would be successful with the Society. Within each persons mind, and from their inner most self of the person, the answers are already here. You already have the building tools of a great Society that will be one of many. There is no need to give credit to the Elders group as we have only guided you to the resources, and the building material is plentiful.

We are at the threshold now of the Societies creation that is the very making of a place of understanding. The messages that will be needed, in the future months, will enclose with it some of the new symbols. The methods of the past have been to create symbols of deities and their colleges of learning by ritual, ceremonies and worship. It is because of these past conditions that have leaned into the corrupt mind of control, and the very worship of symbols, wrought by man that has, at this time, caused the formation of this society. One Religion after the other, along with their subsidiaries, has been trying to come out as the one only true religion. Thus for sometime humans, save a few, have been slipping backward and evolving backwards. Those that have tried to set mortals back to the forward method of evolution, have been ridiculed, persecuted and dishonoured by the world and set up as heretics.

The roadway before the Society is ever widening and it is the path for many souls to walk hand in hand into the future. The upcoming organizing will prepare our group for welcoming many, to travel side by side, as an ever increasing tide of love, compassion and understanding.

At this time it is necessary to plan and to think about the direction ahead. While thoughts of growth are being nurtured, it

is important to rest, both for us as Elders and for receiver (Wayne). Because of the risk of misinterpretation it is necessary to decide the next carrier whether it is Wayne or if others become open. The symbols for the spiritual power of prayer (thought) are new and for the mental and the thought mechanisms. Therefore it is not to be blended into the old rituals and ceremonies, which used symbols from the past.

To thank you is not enough but to be part of you in your affairs of the day is our quest. The opening up of new methods of growth lay before us as a body in spirit and working with mortals. It is common among the Elders to say, “ If you think you can, then you can.” We are willing and eager to communicate with all involved and to be graded for reception and the transmission of thought.

SHADE OF LOVE

Like the early evening mist
Creeps into the place of mind
It becomes a cover from the heat
Of the worlds searing woe's

Rest yourselves within it
And partake of its growth
Let the doubts go around us
And absorb the shade of love

To heal the worlds wounds
Is not the path we chose
To love with understanding
By the shade of love we made

As a balm for blistered minds
The shade of love is there

To cover up the scrapes of life
The shadow shows its worth.
Wayne
